

Richard Havens

Vice President of Construction Management

Scope of Services

As the Vice President of Construction Management, Mr. Havens is responsible for the overall success of NAI/Merin Hunter Codman's general contracting and construction management operations. Mr. Havens oversees all facets of project management, including general contracting operations, pre-construction services, estimating and field management.

Background & Experience

Mr. Havens started his engineering and construction career in 1995 and joined NAI/Merin Hunter Codman, Inc. in October 2009 and has successfully held positions as Director of Engineering and then as Director of Property Operations. Prior to joining the firm, Mr. Havens worked in engineering and construction positions for prominent national and international companies including Jacobs Engineering and Taylor Woodrow Development.
